

Pihls is a TPL/3PL (Third Party Logistics) company that undertakes to perform all or part of the logistics services required to ensure material flows between a business and its customers. This provides the flexibility, cost effectiveness and a greater focus on their customer's core business. Pihls offer the complete solution from incoming goods from your supplier for distribution to your end customer. If the goods require some extra work we will solve it. Repacking, sorting, assembly, quality control, washing etc. Our warehouses are equipped with modern pallet rack systems, scanners, labelling and forklifts. Our well trained staff takes good care of your goods. If required we can set up a customized handling around your goods.

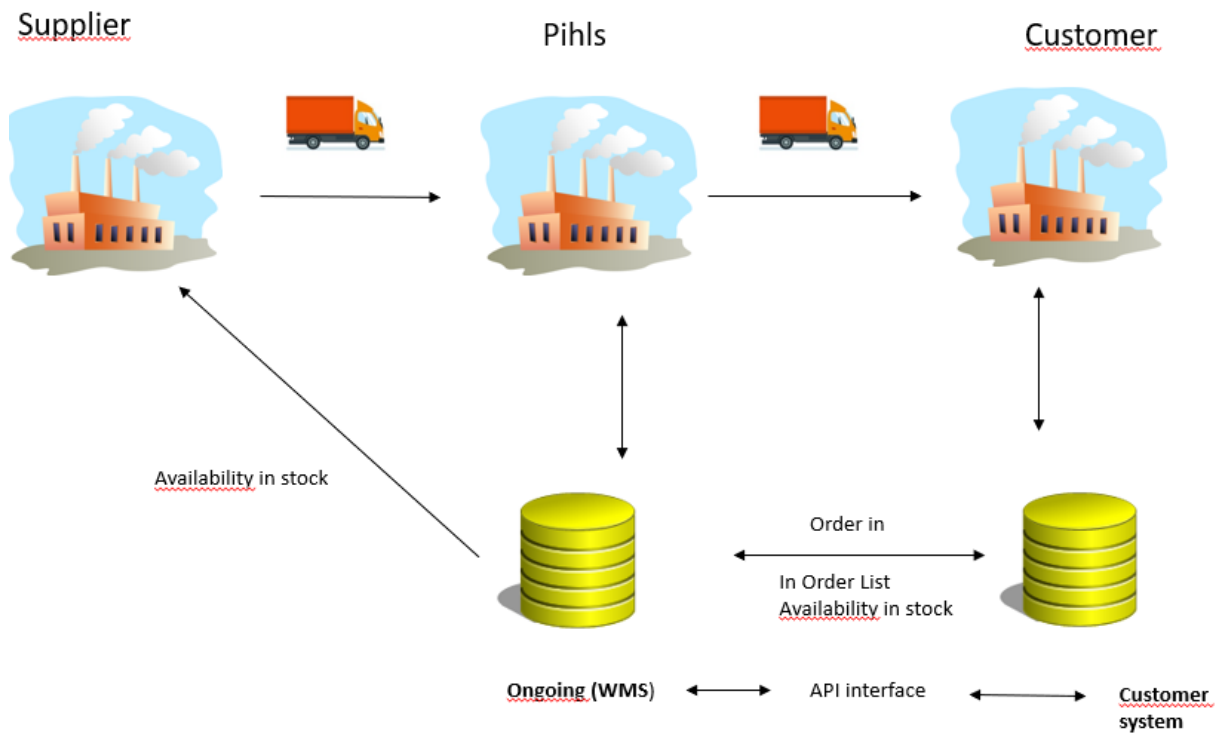

We handle incoming goods with loaders and trucks for an easy way to unload and load the goods. Usually, we handle pallets coming on trucks but also cargo that come to us in containers.

Pihls uses FIFO or otherwise as agreed. Stacking or storage in racks or shelves is what we offer and we record every event in our EDI web-based storage system. The system is simple and transparent and customers can easily monitor all events, keep track of stock levels and place orders to us directly through the system. Our system is easy to integrate with other MPS systems.
